

## Transport in mesoscopic systems (T) - physics762

<i>Course</i>	Transport in mesoscopic systems (T)
<i>Course No.</i>	physics762

Category	Type	Language	Teaching hours	CP	Semester
Elective	Lecture with exercises	English	2+1	5	WT/ST

### Requirements for Participation:

#### Preparation:

Classical mechanics

Elementary thermodynamics and statistical physics (physik521)

Advanced quantum theory (physics606)

Introductory theoretical condensed matter physics (physics617)

**Form of Testing and Examination:** Requirements for the examination (written or oral); successful work with the exercises

**Length of Course:** 1 semester

#### Aims of the Course:

Understanding essential transport phenomena in solids and mesoscopic systems

Acquisition of important methods for treating transport problems

#### Contents of the Course:

Linear response theory

Disordered and ballistic systems

Semiclassical approximation

Introduction to quantum chaos theory, chaos and integrability in classical and quantum mechanics

Elements of random matrix theory

Specific problems of mesoscopic transport (weak localization, universal conductance fluctuations, shot noise, spin-dependent transport, etc.)

Quantum field theory away from thermodynamic equilibrium

#### Recommended Literature:
